

Team 1 Chocoholics Anonymous User Manual

Accessing the Repository

1. Visit the repository Spring23team1 at bitbucket.org
2. Click on the “Clone” button at the top of the page
3. Click the “Copy” button to the right of the link that appears on the page
4. In an IDE, paste the link where appropriate to access the repository
5. When ready to use, pull changes to ensure latest version of software is in use

Creating the JAR

1. Navigate to the repository in the windows terminal
2. Write ant
3. Press enter

Entering the Software

1. Run the program using the command “java -jar ChocAnDataCenter.jar” in the visual studio code terminal
2. A screen will appear with three menu buttons. Choose the menu button for which type of user you want to access the software as.
3. You will be prompted to enter an ID number. Valid ID numbers for each user type are found in the Member_Record, Provider_Record, and operatorCreds files respectively.
4. Enter a valid ID number for the user type you are logging in as.
5. You will be taken to a menu corresponding to the appropriate user type.

Provider Menu

1. Bill ChocAn
 - A prompt will appear asking for a member number. Enter a valid member number, found in the Member_Record.txt file
 - A page with four text boxes will appear. Enter a six-digit date in the “Today’s Date” and “Date Service was provided” boxes
 - Enter a valid service code found in the provider_directory file into the “Service Code” box
 - Add any comments in the comments box, and then click “Bill ChocAn”
 - A report of the service will be created and ChocAn will be billed
2. Validate member
 - A prompt will appear asking for a member number
 - Enter a valid member number, found in the Member_Record.txt file
 - The software will notify that the member has been validated
3. Service lookup
 - A box will appear with the prompt “Service Code:”
 - Enter a valid service code, found in the provider_directory.txt file
 - Click “Lookup”
 - The name of the appropriate service will appear

4. Fees lookup
 - A box will appear with the prompt “Service Code:”
 - Enter a valid service code, found in the provider_directory.txt file
 - Click “Lookup”
 - The fee for the appropriate service will appear
5. Request Provider Directory
 - A provider directory with service codes, service names, and corresponding fees will appear

Manager Menu

1. Summary Report
 - A summary report will appear on screen
2. Member Report
 - A prompt for a member number will appear. Enter a valid member number found in the Member_Record file. A report with that member’s information will appear on screen
3. Provider Report
 - A prompt for a provider number will appear. Enter a valid provider number found in the Provider_Record file. A report with that Provider’s information will appear on screen

Operator Menu

The Operator Menu is used to add, remove, or edit records of individuals in the ChocAn system.

1. You will be prompted to enter an ID number
2. Enter a valid operator number, found in the operatorCreds file
3. A menu with two buttons will appear, one for members and one for providers
4. Click the button for which member type you want to add, remove, or edit records for
5. Enter a valid ID number for the user type you selected, found in the Member_Record or Provider_Record files
6. Three buttons will appear, labeled Add, Remove, and Edit
7. Click which action you would like to perform
